

PRODUCTION CORPORATE SOCIAL RESPONSIBILITY

LOCALLY MANUFACTURED, INTERNATIONALLY ACTIVE

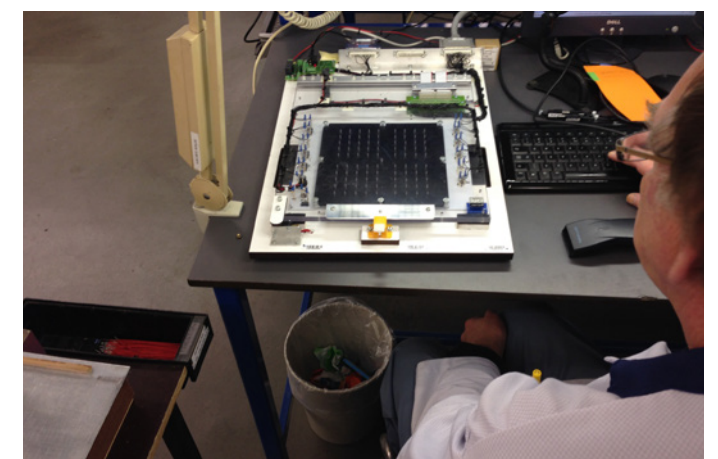

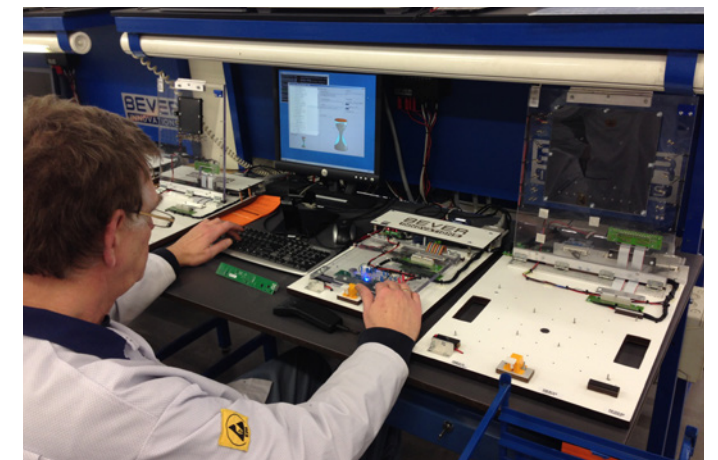

As a manufacturer of intelligent outdoor LED solutions with a 100% focus on the petrol retail market, Bever Innovations is the market leader in LED lighting products for petrol stations. Bever Innovations is represented globally and supplies its products in over 54 countries to many clients including Shell, BP, Q8 and Total.

Besides subdivisions in Germany, Finland and UK we have partners in most European countries, South America, Australia, Africa, as well as the Far East. Every day our products prove themselves as high quality LED solutions to our customers, on thousands of forecourts around the globe. In 2009, the European Commission officially recognized Bever Innovations as a 'GreenLight Endorser' for its efforts in the field of energy-efficient lighting.

"We have a Social Return Agreement with Bever Innovations. Our simultaneous aim is to provide a supportive environment to physically or mentally challenged people and to contribute and increase the employment rate of people with a distance to the labour market".

"Seeing contented workers at our social enterprise producing these high quality products brings both parties much fulfillment".

Clen de Kraker – Dethon, Terneuzen

Social involvement

The production and assembly of the LED products takes place in two different social factories close to the Dutch head office in Zierikzee; 'Orionis' in Vlissingen and 'Dethon' in Terneuzen.

In addition to the 40 employees of Bever Innovations, nearly 200 people work daily in manufacturing to produce the high quality LED products. This combination has been very successful from the beginning.

This way of working offers both parties a number of advantages:

- Specialized production facilities close to the Dutch headquarters
- Competitive and flexible production
- The sheltered workshops employees increase their career opportunities
- High production quality under the special supervision of Bever Innovations' R&D team
- This initiative is close to our hearts fits within the company ethos
- ISO 9001 certification

From the design and the procurement to guiding the production at the workshops, everything is completed by us in the Netherlands and exported all over the world. As well as manufacturing, Bever Innovations also provides installation and service of the LED products in the BeNeLux countries. We are involved in all stages of these projects; from transportation, installation and connection to the final commissioning.
